Informed Consent for Termination of Pregnancy

I hereby give my full and informed consent to: Dr. D Kim and his/her associates at QSCA LLC to terminate my pregnancy. I have considered my alternatives regarding this pregnancy and I voluntarily and of my own free will consent to the termination of pregnancy procedure.

I authorize the above physician and/or his/her associates to carry out such diagnostic procedures, administer treatment, anesthetics and/or medications, as he/she may deem necessary and advisable to insure my proper treatment.

My physician has fully explained the risks, and drawbacks involved as well as the possibility of complications from the procedure, including INFECTION, PERFORATION OF UTERUS, and the benefits of the procedure. We have also discussed alternatives including no treatment; to the procedure along with those risks and benefits. I am aware that no guarantee or assurances as to the results of the procedure have been made and I have been told that no guarantee of results could be made. By signing this consent, I agree that all the foregoing has taken place to my satisfaction.

I have received pre and post-operative (before and after) instructions; both written and verbal. I was given a chance to ask questions and all of my questions have been answered to my satisfaction. I am aware of the recovery period required as well as any potential problems I may encounter during this time.

I represent that my medical history is accurate including medical conditions, use of medications, allergies to medications, use of any drugs (such as marijuana, crack, cocaine, heroin, valium, codeine) or alcohol. I am aware that withholding information regarding my medical history or use of drugs could be life threatening, and that the physicians treating me are NOT responsible for complications related to the information that I withhold.

Therefore, I authorize my physician in addition to any assistants whom he/she might designate, to perform this operation together with any preoperative or postoperative treatment upon me.

I authorize the operating physician to perform any procedures, which he may deem necessary in attempting to improve the condition for which I am being treated or any unforeseen condition that he may encounter during the operation.

I also consent to the administration of anesthesia, general, IV sedation, or local, to be applied by or under the direction of the Anesthesia Department and /or the operating physician, and the use of such anesthetics as deemed advisable. I understand the risks, complications and potential benefits of anesthesia; as well as potential problems associated with anesthesia during the recovery phase. These risks include but are not limited to, nausea and vomiting, trouble breathing, low blood pressure, cardiac arrhythmia, cardiac arrest, death.

I consent to observers in the procedure room as approved by my physician for the purpose of training or quality assurance. I authorize my physician to disclose complete information concerning his medical findings and treatment for the undersigned, from the initial consultation until date of the conclusion of such treatment, to those individuals who in my physicians sole determination, are required to receive such information for the purpose of medical treatment, medical quality assurance and peer review.

DR D KIM 11-27-17
PARK, MINHYE
F, DOB [REDACTED]Consent for Anesthesia

I hereby authorize the anesthesiologist Dr. films or his/her colleague, to administrate intravenous sedation (MAC), general, or local anesthesia on me for the proposed procedure. The anesthesiologist has fully explained to me the nature, benefits, risks, possible complications and alternative treatments for the anesthesia, including no anesthesia. These risks include but are not limited to, nausea, vomiting, trouble breathing, pneumonia, aspiration, low blood pressure, cardiac arrhythmia, cardiac arrest, or death. I understand that I should not have eaten food or drank fluid at least eight hours prior to the procedure. I also understand the necessity for an escort and the potential risks in traveling after anesthesia without an escort. I have been given an opportunity to ask questions and all my questions have been answered.

Assignment and Release

I authorize the release of any personal and medical information necessary to process this claim. I permit copy of this authorization to be used in place of the original. I authorize Dr. films to apply for benefits on my behalf for covered services rendered by him or his order. I request that payment from my insurance company be made directly to the doctor. I certify that the information I have reported with regard to my insurance coverage is correct.

OPERATIVE REPORT

Name of patient: MINHYE PARK
Patient date of birth: [REDACTED]

Preoperative Diagnosis: ELECTIVE TERMINATION OF PREGNANCY
Procedure: SUCTION DILATATION AND CURETTAGE
Postoperative Diagnosis: ELECTIVE TERMINATION OF PREGNANCY

Surgeon: David Kim, MD Assistant: None
Anesthesiologist: Guo, MD Anesthesia: MAC
Complications: None.
Estimated Blood Loss: 20 mL
Specimen(s): PRODUCTS OF CONCEPTION.

Description of Operative Procedure:

After risks and benefits of options were discussed with the patient, informed consent was signed and obtained. Patient understands and accepts possible risks of suction dilatation and curettage, including but not limited to bleeding, perforation of the uterus, infection, perforation of the uterus (with or without possible injury to organs surrounding the uterus (including but not limited to the urinary bladder and/or the bowel), cervical laceration, retained products of conception, Asherman's syndrome, and/or pain. Informed consent was signed and obtained. Patient voided urine in the bathroom, and then was transferred to the operating room.

MAC anesthesia was given by Dr. Guo. Patient was then placed in the dorsal lithotomy position, the patient was prepped and draped in sterile fashion. Sterile heavy weighted speculum was placed in the posterior portion of the vaginal vault. A Sims speculum was placed in the anterior portion of the vaginal vault. An Allis clamp was used to grasp the anterior lip of the cervix. The endocervical canal was gently and gradually dilated with Hanks dilators. A 6 mm suction curette was used to perform a suction curettage. A sharp curettage was then gently performed throughout the endometrial cavity until a gritty texture was appreciated. A suction curettage was repeated to remove the remaining products of conception. All instruments were then removed from the vagina. Excellent hemostasis was visualized. Instrument and sponge count were correct times two. Patient was transferred to the recovery room in stable condition.

Discharge Instructions:

1. Pelvic rest: No sex, no tampons, no douche, and no tub baths for 3 weeks.
2. Call Dr. Kim and go immediately to NY Presbyterian-Queens ER if fever, severe abdominal pain, or heavy vaginal bleeding.
3. Advil 400mg po q 6 hours with food for 3 days per pain.
4. Follow up with Dr. Kim in the office in 3 weeks.
